

The World's Most Trusted Conveyor

GBX

Automated System for Uniforms and Locker Bags

Designed for the Hotel, Casino and Resort Markets

Reduces Labor Costs while Improving Service to Team Members
Heavy Duty, Cost Effective, Easy-to-Use

The World's Most Trusted Conveyor

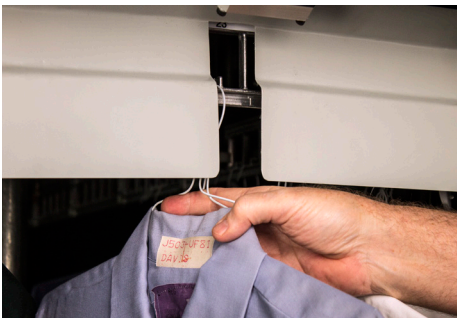

Heavy duty uniform room automation that can operate independently or interface with major garment tracking programs

The world's leading provider of Automated Uniform Storage and Retrieval Systems now offers the GBX - a value engineered solution that handles uniforms, locker bags or both.

The GBX system operates with standard electric service - no air compressor is required. In addition, there is no longer a need for counter attendants to dispense and collect uniforms or locker bags. White's GBX provides affordable uniform room automation for any size property.

By reducing labor costs and securing uniform inventory, the GBX provides fast payback, typically within 12 to 18 months.
